PROJECTS

AI Health Prediction System

Rule-based disease prediction platform for seven conditions, with BMI calculation, appointment booking, PDF report export, a floating chatbot, voice input via the Web Speech API, and a dark/light mode toggle. Built with HTML5, CSS3, JavaScript, PHP 8.0, MySQL 8.0, and Chart.js.

IoT Based Smart System

Designed and developed an IoT-based solution using sensors and microcontrollers to collect, monitor, and transmit real-time data for practical applications.

Flight Booking Web Application

Designed and implemented user-friendly front-end interfaces for a flight booking application using HTML, CSS, and JavaScript.

INTERNSHIP

Flight Booking Front-End Project — IZEON Innovative Pvt. Ltd., Chennai (3 Months)

Gained hands-on knowledge in front-end web development and UI/UX using HTML, CSS, and JavaScript. Designed and developed a user-friendly front-end interface that allows users to search flights and perform booking operations easily.

CERTIFICATIONS

- Internet of Things (IoT) — Maxelevator Foundation, Madurai
- Front-End Web Development — IZEON Innovative Pvt. Ltd., Chennai
